PROFESSIONAL EXPERIENCE

FAST Enterprises, LLC — Implementation Consultant

Oct. 2024 – Present

Oregon Driver Services and Vehicle Services Project (Oregon DSVS, Salem, OR)— On-site with Oregon DMV/ODOT stakeholders.

C#/.NET/VB, SQL Server, SOAP-REST API, Web Sockets API

- Develop, maintain, support features, and resolve tickets within the Oregon DMV's system.
- Served as lead developer on a 3-month initiative to resolve a data integrity issue with a vehicle's MPG rating resulting in registration fee miscalculations; gathered requirements directly from Oregon state government stakeholders in recurring working sessions to scope a solution under a fixed deadline.
- Designed and implemented a new DMV-sourced data feed with automated nightly updates to amend the third-party data, and built the application workflow allowing authorized users to update vehicle MPG records.
- Converted several hundred legacy VB.NET files to C# as part of a system-wide platform upgrade to reduce technical debt and modernize the codebase.
- Converted vital web services like Electronic Vehicle Registration (EVR) that had 0 new issues when they went live.
- Coordinated with third-party vendors to plan and validate interface/service conversion testing and conducted performance testing on the system to identify and address reliability bottlenecks.
- Stepped in as an emergency team lead for one month, organizing task assignments and coordinating team priorities to keep the upgrade project on schedule.

EDUCATION

University of California, Davis — Bachelor of Science in Computer Science | September 2022 – June 2024

GPA: 3.76 Davis, CA

Modesto Junior College — Studies in Biology | Sep. 2019 – June 2021

GPA: 3.94 Modesto, CA

RELATED EXPERIENCE

UC Davis Tutoring Center — Computer Science Tutor | July 2023 – June 2024

University of California, Davis, CA

- Tutored undergraduate students in algorithms, data structures, and operating systems by translating technical concepts into clear explanations for learners of varied skill levels.
- Prepared instructional materials and worked one-on-one and in small groups to reinforce core computer science fundamentals.

UC Davis EcoCar Application — DevOps Developer | January 2024 – June 2024

University of California, Davis, CA

- Built and maintained a CI/CD pipeline using Jenkins to automate code checkout, linting, and build validation, reducing manual effort and improving release reliability for the team.
- Designed the deployment architecture for Streamlit dashboards while maintaining secure, VPN-restricted access.
- Containerized a PostgreSQL server using Docker to enable consistent database access across development teams.

Include Club — Web Developer | January 2024 – June 2024

University of California, Davis, CA

- Implemented JWT-based authentication in TypeScript and built a secure login form with input sanitization to prevent SQL injection and XSS attacks.

PROJECTS

IT Ticket Tracker | August 2026 – Current

C#, ASP.NET Core, SQL Server, Dapper

- Built an IT support ticket tracker web application using an ASP.NET Core Web API (C#) with Dapper against SQL Server.

TECHNICAL SKILLS

Languages: C#, VB.NET, SQL/T-SQL, C++, JavaScript, HTML/CSS

Frameworks: ASP.NET, .NET

Databases: SQL Server (SSMS), PostgreSQL

Developer Tools: Visual Studio, SSMS, SOAPUI, Git, Docker, Postman, CLI, Bash
